

Technologies of human classification: phrenology, physiognomy, and AI?

Francis Galton (1877). Composite portraits of human 'types'
Galton was a prominent eugenicist

Wu and Zhang (2016).
Automated Inference on Criminality using Face Images

Claimed 90% accuracy using CNN to detect "criminals"
based on photo ID

Machine learning does not distinguish between correlations that
are causally meaningful and ones that are incidental.
